omniReader®

Portable Scanning and Reading Solution with Display

Accurately and instantly read and magnify text

---

i

The omniReader is a portable scanning and reading solution that makes printed text accessible for people who are blind or have low vision.

Perfect for people who want to combine magnification and speech in one product.

Scan materials in 17 different languages with multiple human-sounding voices.

By pressing a single button, the omniReader reads printed text to you

You can follow the magnified text in high-contrast colors on the built-in screen, or simply listen as the omniReader reads text out loud. You can also use the screen to instantly magnify objects and text, and see them more clearly. Thanks to its lightweight design, built-in handle, and long battery life, you can pick it up and use it wherever you want – at home, at the office, and even on the go.
